Fatal Occupational Injuries in North Carolina – 2016

Fatal work injuries totaled 174 in 2016 for North Carolina, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Janet S. Rankin noted that the number of work-related fatalities in North Carolina has increased in each of the last three years. Fatal occupational injuries in the state have ranged from a high of 234 in 2000 to a low of 109 in 2013. (See chart 1.)

Nationwide, a total of 5,190 fatal work injuries were recorded in 2016, a 7-percent increase from the 4,836 fatal injuries in 2015, according to the results from the Census of Fatal Occupational Injuries (CFOI) program. This was the third consecutive increase in annual workplace fatalities and the first time more than 5,000 fatalities have been recorded since 2008.

Chart 1. Total fatal occupational injuries, North Carolina, 2007–2016 200 180 167

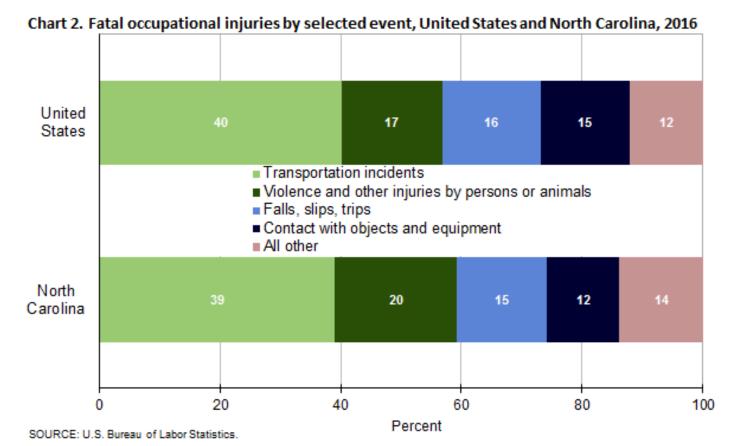

SOURCE: U.S. Bureau of Labor Statistics.

Type of incident

In North Carolina, transportation incidents resulted in 68 fatal work injuries and violence and other injuries by persons or animals accounted for 35 fatalities. These two major categories accounted for 59 percent of all workplace fatalities in North Carolina. (See table 1.) The number of worker deaths from transportation

incidents increased from 51 over the year and worker fatalities due to violence and other injuries by persons or animals were up from 24. Falls, slips, or trips was the third-most frequent fatal work event with 26 fatalities, unchanged from 2015.

Nationally, transportation incidents were the most frequent fatal workplace event in 2016, accounting for approximately 40 percent of fatal work injuries. (See chart 2.) Violence and other injuries by persons or animals was the second-most common fatal event (17 percent), followed by falls, slips, or trips (16 percent).

Industry

The private construction sector had the largest number of fatalities in North Carolina with 30, unchanged from the previous year. (See table 2.) Specialty trade contracting accounted for 22, or about 73 percent, of the fatal injuries in this industry.

The private transportation and warehousing industry sector had 25 workplace fatalities, up from 16 in the previous year. Thirteen, or 52 percent, of those fatally injured in this sector worked in general freight trucking.

Occupation

Transportation and material moving occupations and construction and extraction occupations had the highest number of workplace fatalities with 44 and 30, respectively. (See table 3.) The majority of the fatalities within the transportation and material moving group were heavy and tractor-trailer truck drivers (25). Construction laborers accounted for 8 of the 30 fatalities among construction and extraction workers.

Additional highlights

• Men accounted for 90 percent of the work-related fatalities in North Carolina, similar to the national share. (See table 4.) Transportation incidents made up 39 percent of the fatalities for men in North Carolina.

- White non-Hispanics accounted for 63 percent of those who died from a workplace injury. Nationwide, this group accounted for 67 percent of work-related deaths.
- Workers 25-54 years old accounted for 57 percent of the state's work-related fatalities in 2016, similar to the 57 percent of on-the-job fatalities nationally.
- Of the 174 fatally-injured workers in North Carolina, 87 percent worked for wages and salaries; the remainder were self-employed. The most frequent fatal event for both groups of workers was transportation incidents.

Technical Note

Background of the program. The Census of Fatal Occupational Injuries (CFOI), part of the BLS Occupational Safety and Health Statistics (OSHS) program, compiles a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2016 national data, over 23,300 unique source documents were reviewed as part of the data collection process. For the North Carolina 2016 data, 923 unique source documents were reviewed. For technical information and definitions for CFOI, please go to the BLS Handbook of Methods on the BLS web site at www.bls.gov/opub/hom/cfoi/home.htm.

Federal/State agency coverage. The Census of Fatal Occupational Injuries includes data for all fatal work injuries, whether the decedent was working in a job covered by the Occupational Safety and Health Administration (OSHA) or other federal or state agencies or was outside the scope of regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency.

Acknowledgments. BLS thanks the North Carolina Department of Health for their efforts in collecting accurate, comprehensive, and useful data on fatal work injuries. BLS also appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

⁽¹⁾ Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

⁽¹⁾ Industry data are based on the North American Industry Classification System, 2012.

⁽²⁾ Includes fatal injuries at all establishments categorized as Mining, quarrying, and oil and gas extraction (Sector 21) in the North American Industry Classification System, 2012, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

⁽³⁾ Includes fatal injuries to workers employed by governmental organizations regardless of industry.

Table 3. Fatal occupational injuries by occupation, North Carolina, 2015-16 - Continued

Occupation (1)	2015	2016	
Occupation (1)	Number	Number	Percent
Motorcycle mechanics		1	1
Miscellaneous vehicle and mobile equipment mechanics, installers, and repairers		1	1
Tire repairers and changers		1	1
Other installation, maintenance, and repair occupations	4	9	5
Production occupations	11	4	2
Transportation and material moving occupations	35	44	25
Air transportation workers		2	1
Aircraft pilots and flight engineers		2	1
Commercial pilots		2	1
Motor vehicle operators	29	37	21
Bus drivers		1	1
Bus drivers, transit and intercity		1	1
Driver/sales workers and truck drivers	28	31	18
Driver/sales workers	3	2	1
Heavy and tractor-trailer truck drivers	21	25	14
Light truck or delivery services drivers	4	4	2
Taxi drivers and chauffeurs	1	4	2
Material moving workers	5	5	3
Industrial truck and tractor operators		3	2
Military specific occupations (2)			

NOTE: Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

⁽¹⁾ Occupation data are based on the Standard Occupational Classification system, 2010.

⁽²⁾ Includes fatal injuries to persons identified as resident armed forces regardless of individual occupation listed.

Table 4. Fatal occupational injuries by selected demographic characteristics, North Carolina, 2015–16

Worker phoraeteristics	2015	2016	
Worker characteristics	Number	Number	Percent
Total	150	174	100
Employee status			
Wage and salary workers (1)	112	151	87
Self-employed (2)	38	23	13
Gender			
Men	142	156	90
Women	8	18	10
Age (3)			
16 to 17 years		1	1
20 to 24 years	4	19	11
25 to 34 years	22	23	13
35 to 44 years	35	36	21
45 to 54 years	35	41	24
55 to 64 years	33	35	20
65 years and over	17	18	10
Race or ethnic origin (4)			
White, non-Hispanic	101	110	63
Black or African-American, non-Hispanic	17	38	22
Hispanic or Latino	17	19	11
Asian, non-Hispanic	7	5	3

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

⁽¹⁾ May include volunteers and workers receiving other types of compensation.

⁽²⁾ Includes self-employed workers, owners of unincorporated businesses and farms, paid and unpaid family workers, and may include some owners of incorporated businesses or members of partnerships.

⁽³⁾ Information may not be available for all age groups.

⁽⁴⁾ Persons identified as Hispanic or Latino may be of any race. The race categories shown exclude Hispanic and Latino workers.
